In an effort to stop his step-daughter from following in his wife's footsteps, he tries to change her mind with money and.Q: How to print the statements in python 2.7.3 on the screen instead of the console? In the ipython shell, I would like to see the print statements appear on the screen, instead of in the console window. Is there any way to achieve this? Thank you very much! A: Add %config InteractiveShell.page = 'less' to your:python\_notebook\_config.py. Q: Multithreaded Radio Tuning Application The following program is a radio tuning application, can be used by any radio tuner. I want to make it multithreaded (one thread reads from the keyboard). Is it possible to make it run on multi-threading? A: I've done multithreaded radio-tuning in the past, and I had a good time doing it. (Although I'd have used a different class for each of the functions and classes that you've currently got, it's a very straightforward task). It's probably not the greatest of ideas, but if you're still 2d92ce491b
