Category:Chemistry softwareQ: cannot get ScrollTop working for getting position of page I want to get the scroll position in my App, so I made this function: function getScrollPosition() { var element = window; var y = \$(element).scrollTop(); var h = \$(element).height(); return { y: y, h: h }; } My problem is, that I can't get it working:

This is how I try to use it: function scrollPosition() { var position = getScrollPosition(); document.getElementById("info_content").innerHTML = position.y; } But I always get an undefined or NaN error, for example with "position.y" and "position.h". A: When you scroll, the new position is calculated over the window element, not over the element you want to update. You have to check the scrollTop on window, not on the element, so var element = window; var y = window.scrollTop; var h = window.innerHeight; U.S. in Afghanistan: 30,000 American Troops and the Pentagon is Out Back in October of 2016, President Obama left Afghanistan. On April 5, 2017, he gave a farewell address to the American people and the media. On May 7, 2017, Obama's administration released a policy document which reflects Obama's vision for Afghanistan, "DoD's Long-Term Strategy for the U.S. Armed Forces in the South Asia Region," in which the U.S. is planning to bring home 31,500 American soldiers from Afghanistan by the end of 2017. The plan is to bring these soldiers home in two distinct stages, first by the end of 2017, and again in 2020, reducing the troop level in Afghanistan to 8,600 by the end of that year. First, the American war in Afghanistan will end in 2017, but there will be no reduction in the number of U.S. troops in Afghanistan, merely a pause in the
