AbleTests User Interface component lets you create and administer any test using the same tools used by teachers in order to assess students' knowledge. The tests created with AbleTests can be completely different from those created with other programs.

AbleTests offers you

TestMaster Crack Download

The core component of the program is a multiple-choice test. It can contain multiple questions with different difficulties as well as multiple question types. Each question can have the same difficulty for multiple answers which are evaluated at the same time. Each correct answer receives one point and an incorrect one - zero points. The custom appearance of the question can include labels or checkboxes. You can include rich text content as well as images that are saved in your chosen format.

The picture is automatically selected when a question is marked correct. You can also use the quizmaker to create multiple-choice questions and to randomize the order. The student can run the test multiple times and submit the answers. You can analyze the results by using the multiple statistical functions provided by the application. You can compute the average grade and the total number of points for each quiz. There is also a button to export the results to a Microsoft Excel spreadsheet. The

teacher component provides data from the students that allows you to view the results for a particular student or group of students. You can access the results by entering the name of the student and a password. TestMaster Torrent Download allows you to add up to 4 users. The teacher can be able to administrate the users at the same time. The user can also remove the items they have not yet finished. A PowerPoint presentation with about 25 slides is included in the TestMaster installation in the

teacher component. The presentation is about the user interface and explains how to configure the application by creating or updating the tests. You can also check the help guide that explains all the settings and configurations of the software that are included in the software package. TestMaster Features: TestMaster is a multi-purpose tool that can be used for multiple purposes. The most practical ones are teaching classes or creating tests. The teacher component will

allow you to administer and manage the users of the software. You can check their exam results and the statistics of all the tests that are administered by one user. The student component is useful for creating tests for multiple students. You can let the students take the tests in a random order and check the results after completing the test. TestMaster can be used to manage multiple classes. Each test can include multiple question types and can be evaluated by multiple users. The results can also be saved and

analyzed by the teacher component.

TestMaster is a versatile application. TestMaster allows you to create multiple quizzes in your students. You can organize them by the class, by the grade

* Tests multiple students at the same time * Students can listen to the voice-over * Teachers can create the tests, assign their students, evaluate them and view the results for each student * Students can choose the topics, number of questions, number of points for the questions and points for wrong answers * Students can check the test result online * Students can receive the score for each question, grade level, unit and

test * The teacher can sort their students by clicking on the icon at the top * Access to the TestMaster is protected with a password to maintain the privacy of the test results * Teachers can create a folder to store the tests * Multiple computers can be used simultaneously if the tests are on the network * Teachers can evaluate the results in the teacher module * Exams can be exported to Microsoft Excel * Students can view the exams by using the included PowerPoint slides This is a multi-

unit interactive math game that offers learners of all levels the ability to control their own math problem solving, by providing game-based procedures and practices to develop understanding. The game offers a unique learning experience, and provides a sophisticated method of teaching which can be accessed at any time from anywhere in the world. Game features include: *

- * Learning is at a pace that is comfortable to the learner
- * Added emphasis to the word problem types and explanations which provides the

learning experience to be personalised * Progress of student's learning is tracked by parents and/or the school * Game provides a baseline of skills and effective games to encourage the learner to move on to higher levels in the game * With the ability to set own goals, parents can view the progress of their children's learning * For those who are comfortable with technology, they can even check the progress of their child's learning by accessing their computer * Mobile games provide an effective learning

tool for the teacher in the classroom as well as at home. The game has three levels. Each level has a set of 15/25 math problems, which children complete to move on to the next level. A parent or teacher can set the goal for the student, and is able to view that child's progress online. Parents can set their child's target point in the game. When that point is reached, a message will be displayed informing the parent that their child has achieved their target. The game has three levels, each containing a set of problems. Level

The TestMaster is a powerful but simple tool for creating multiple-choice quizzes or tests for grading students' knowledge. The program supports multiple test settings. You can create a test that will be automatically graded and use it for grading examiners. The questions can be sorted by difficulty, but the order can be random for an extra challenge. The results can be exported to HTML, comma-separated values or Excel. You can also review the set of results in the

teacher's module. The test's progress is tracked by the number of answers, time and correct answers. The time is calculated in intervals. The progress can be printed and emailed. Features: -Create quizzes and tests -Sort questions by difficulty or random -Export results to CSV, HTML or Excel -View results in the teacher's module -Create quizzes and tests using either fill-in-the-blanks or multiple-choice questions -Multiple test types -Edit/delete/print student results -Create quizzes for a class -Export

quizzes to HTML -Create quizzes for a class -Create quizzes and tests for multiple students -Grading and testing -View test results in the teacher's module -Export test results to HTML -Create quizzes and tests for multiple students -Create quizzes for a class -Export tests to HTML -Create quiz results by subject, grade level and unit -Create test results by subject, grade level and unit -Configure database with student names and exam topics -Control database access -View test results in the teacher's module

-Export test results to HTML -View test results in the teacher's module
-Create quizzes and tests for multiple students -Create quizzes for a class -Export tests to HTML
-Create quizzes for a class -Create quizzes and tests for multiple students -Create quizzes for a class
