Packages.com Custom Domain Name How to configure Open License with a custom domain name Open License allows you to have a custom domain name assigned to your installation. This makes your license easier to remember and more clearly identifies your products. Step 1 - Login to the Admin area of Packages.com Click Admin in the toolbar and type openlicense.org in the search box The openlicense.org domain is your custom domain name. You can also use any registered or approved subdomain name for your domain. Step 2 - Add your custom domain name In the left pane of the Admin area, click on Domains Type in your domain name (optional). Click the Add button Step 3 - Map your domain to your Open License installation In the left pane of the Admin area, click on Domains Click on the domain name that you just added. Click on Domains > Domains that use our software Make sure that you have added openlicense.org to the Domains That Use Our Software. If you don't add a domain then openlicense.org will not be used for your installation.Q: How to determine missing keys and values in Map[String, String] I have a Map[String, String]. Open License [Updated-2022]

Simplified licensing management for .NET (2.0+), Silverlight, WPF and ASP.NET applications. Designed with the developer in mind, a licensing manager is a must have tool for those developing solutions in the Microsoft .NET ecosystem. Our goal is to provide users with the capability of granting both single and multi-user licenses with ease. An Open License is a .NET runtime, which allows for easier licensing management. When installing the Open License version of an application on a developer's machine, the developer will already be licensed to run the application and will not have to go through the hassle of going through the application and granting license permissions. Instead of trying to track down which users are using which software, an Open License will handle that for you. Once the application is installed on the developer's machine, the Open License will automatically ask the user for the number of licenses they need, whether they require a serial number and if they want to purchase a license. We have tried to make the licensing management process as simple and intuitive as possible. We hope you find the Open License an easy to use application. 0 comments E-Mail Username / Password Password By submitting you agree to receive email from TechTarget and its partners. Field of the Invention This invention relates to an injection molding machine for injection molding a material such as resin. 2. Description of the Related Art In conventional injection molding machines, a material in a hopper is supplied to a screw, the screw is rotationally driven to mix the material with a molding material and plasticize the material, and the thus plasticized material is sent to a molding cavity. As shown in FIG. 6, a screw 1 is provided with a screw body 1a and a plurality of radially extending screw grooves 2. The screw grooves 2 are designed to be continuous along the circumferential direction of the screw. A space G is formed between the outer surface of the screw grooves 2 and the inner surface of the hopper 3. In the conventional injection molding machine, when the material is plasticized to be in a molten condition, the material is injected into the molding cavity 4 through a gate 5 provided on the molding cavity 4 and the material is extruded from the screw gro
