Elecard Converter Studio AVC HD Edition Product Key is a software tool which can be used in order to convert video files from your camera to other formats, such as MPEG and AVI, with configurable settings. The interface boasts a modern and intuitive design, and it is comprised of a menu bar and several panels which enable you to view the movie, task parameters, statistics and messages. Aside from that, both experienced users and beginners can get around it, without running into difficulties. In fact, there are even some extensive and well-organized Help contents provided, so that anyone can learn how to use Elecard Converter Studio AVC HD Edition at its full potential. It supports MPG, MP4, AVI, M2TS, 3GP, MOV, WMV, AAC, MKV, AC3 and AVC HD files, which can be added with "Open Media File" and "Open Media Files" buttons. However, it does not support the "drag and drop" function, which can be considered a setback. Batch conversion is possible and there are many built-in profiles you can use in order to process your files. Nevertheless, you can also set up your own preferences, such as establishing output video size, number of passes, format and frame encoding type, tweaking the quality, bit rate, gob length, B-frames, aspect ratio and resolution. This program also integrates a few editing options, such as trimming the length of the video, correct brightness, contrast, saturation, hue and gamma levels, input frame rate and crop the movie. Statistics pertaining to the current task can be generated, such as number of frames encoded, average speed, video bit rate and remaining time. The conversion process does not hinder with the system's resources, as it uses low CPU and memory. Taking all of this into consideration, we can safely say Elecard Converter Studio AVC HD Edition is a good choice for people interested in converting video files, with many options to tinker with and a good response time.
